We designed this saddle to help you be a consistent winner. Properly designed equipment helps everyone perform better. This saddle is an advanced piece of equipment which will help you ride and rope better, and enable a horse to perform better.

- ▶ Would you expect an Indy 500 driver to show up for a race with a car designed 30 years ago?
- ▶ Could a pro golfer be a winner with clubs used in 1950? It's doubtful.

## Double J Saddlery Hi Tech Roper

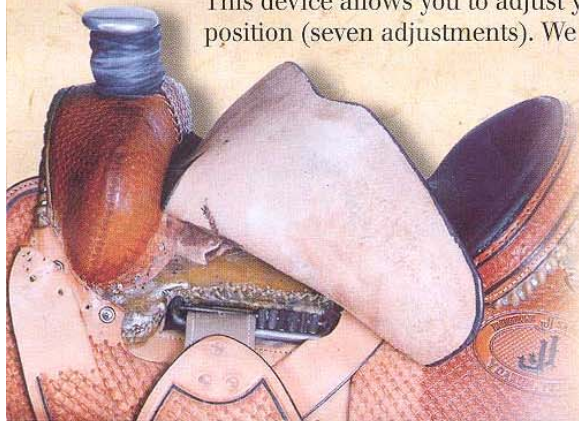

### Double J Saddlery Adjustable Stirrup Leather Hanger

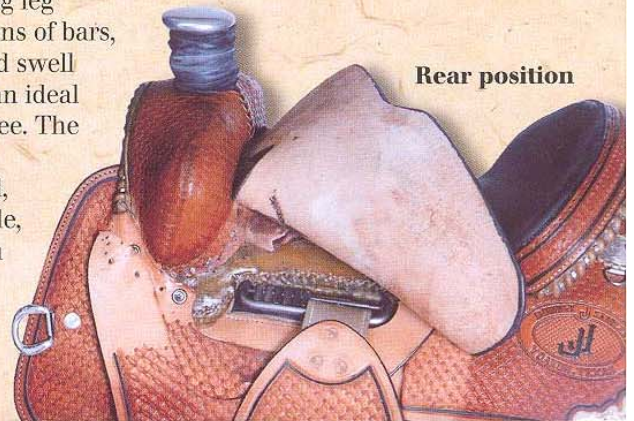

An intensive effort to develop the best roping saddle in the industry started in 1991 when John DeBord patented the adjustable stirrup leather hanger (Patent #5261212).

This device allows you to adjust your balance by changing leg position (seven adjustments). We tried many configurations of bars,

gullet dimension and swell until we developed an ideal fit for our Hi-Tech tree. The wood tree is heavily fiberglass-reinforced, covered with bullhide, and hand-laced with rawhide. We offer a lifetime warranty to the original owner.

Hi-Tech horn after you wrap with rubber

Brushed aluminum finish Hi-Tech horn

### Double J Saddlery Hi Tech Horn Patent Pending

Our Hi-Tech Horn (Patent Pending) is a very distinct feature on this saddle. The horn features smooth rounded edges and a unique lip on the horn. You can put more rubber on the horn without an excess build up in back. Dallys hold better and dallying is smoother.

Roping and all other sports are too competitive for you not to use the best, most advanced equipment possible.
